

## Adding Resources

As well as adding interactive exercises for your students, you can provide them with static resources.

To add a resource, turn on your editing, choose the section in your Course homepage where you'd like it to appear and click the drop down menu "Add a resource".

- ✓ File - If you want to upload your course documents in another format, you can save them on Moodle and provide easy access for your students.
- ✓ Folder - If you upload a lot of content, you may want to organize it in directories. Then you can display the contents of the entire folder instead of creating individual files.
- ✓ IMS content package - An IMS content package allows for packages created according to the IMS Content Packaging specification to be displayed in the course. IMS is a body which helps defines technical standards for various things, including e-learning material.
- ✓ Label - A label enables text and images to be inserted among the activity links on the course page.
- ✓ Page - A page enables a web page to be displayed and edited within the course.
- ✓ URL - You can also easily create links to other web sites outside your Moodle course.
